## **1. Introduction**

### *Explanatory Note*

As used throughout this document, the terms “First Republic,” the “Bank,” “we,” “our” and “us” mean, except as the context indicates otherwise, First Republic Bank, a California-chartered commercial bank including all of its subsidiaries.

For references to disclosures contained within this report and in the Bank’s other regulatory disclosures and public filings, refer to “Exhibit A: Cross-Reference Table.” Included in Exhibit A are references to the Bank’s Annual Report on Form 10-K for the year ended December 31, 2019 (“2019 Form 10-K”) and the Bank’s Consolidated Reports of Condition and Income as of December 31, 2019 (“12/31/2019 Call Report”).

### *Company Overview*

Founded in 1985, First Republic Bank is a California-chartered commercial bank and trust company headquartered in San Francisco with deposits insured by the Federal Deposit Insurance Corporation (“FDIC”). First Republic and its subsidiaries offer private banking, private business banking and private wealth management, including investment, trust and brokerage services. First Republic specializes in delivering exceptional, relationship-based service and offers a complete line of products, including residential, commercial and personal loans, deposit services, and wealth management. As of December 31, 2019, we had total assets of \$116.3 billion, total deposits of \$90.1 billion, total equity of \$9.9 billion and wealth management assets under management or administration of \$151.0 billion.

As of December 31, 2019, we provided our services through 89 offices, of which 78 are licensed deposit-taking offices primarily in the following areas: San Francisco, Palo Alto, Los Angeles, Santa Barbara, Newport Beach and San Diego, California; Portland, Oregon; Boston, Massachusetts; Palm Beach, Florida; Greenwich, Connecticut; New York, New York; and Jackson, Wyoming. We have 11 offices that offer exclusively lending, wealth management or trust services. We have been continuously headquartered in San Francisco since our inception.

### *Basis of Consolidation*

The basis of consolidation used for regulatory reporting is the same as that used under the accounting principles generally accepted in the United States (“GAAP”). There are no subsidiaries that are deconsolidated or deducted from total capital.

See “Basis of Presentation and Organization” in Note 1, “Summary of Significant Accounting Policies” in “Item 8. Financial Statements and Supplementary Data” in the 2019 Form 10-K for more information on the basis of consolidation.

### *Restrictions on the Transfer of Funds or Regulatory Capital*

There are no material restrictions or other major impediments on transfer of funds or total capital within the consolidated group.

### *Capital of Insurance Subsidiaries*

The Bank does not have any insurance subsidiaries.

### *Compliance with Capital Requirements*

As of December 31, 2019, First Republic had capital levels in excess of the minimum regulatory capital requirements and was “well-capitalized” under the prompt corrective action requirements currently in effect. For further detail on capital ratios, see Note 23, “Regulatory Capital” in “Item 8. Financial Statements and Supplementary Data” in the 2019 Form 10-K. At December 31, 2019, each regulated subsidiary met all capital requirements to which it was subject.

## 2. Capital Structure

Common equity (i.e., common stock, capital surplus, and retained earnings) is the primary component of the Bank's capital structure. Common equity allows for the absorption of losses on an ongoing basis and is available for this purpose. Further, common equity allows for the conservation of resources during periods of stress, as it provides First Republic with discretion on the amount and timing of dividends and other distributions. Regulators and rating agencies also include forms of capital other than common equity (e.g., preferred stock and subordinated debt) in their calculations of capital adequacy. Such forms of capital are included in the Bank's Tier 1 capital and total capital.

The terms and conditions of the Bank's capital instruments are described in the following sections of the Bank's 2019 Form 10-K:

- Common Equity Tier 1 ("CET1") capital — Common stock terms and conditions are described in Note 18, "Common Stock and Stock Plans" in "Item 8. Financial Statements and Supplementary Data."
- Additional Tier 1 capital — Preferred stock terms and conditions are described in Note 17, "Preferred Stock" in "Item 8. Financial Statements and Supplementary Data."
- Tier 2 capital — Subordinated notes terms and conditions are described in Note 13, "Borrowings" in "Item 8. Financial Statements and Supplementary Data."

The following table presents the components of First Republic's capital structure:

**Table 2.1: Capital Structure**

(\$ in thousands)	December 31, 2019
Shareholders' equity:	
Preferred stock	\$ 1,145,000
Common stock	1,686
Additional paid-in capital (surplus)	4,214,915
Retained earnings	4,484,375
Accumulated other comprehensive income	5,131
Shareholders' equity	<u>9,851,107</u>
CET1 capital adjustments and deductions:	
Preferred stock	(1,145,000)
Goodwill and other intangible assets, net of deferred taxes	(216,742)
Deferred tax assets that arise from net operating loss and tax credit carryforwards, net of deferred tax liabilities	(113,042)
Accumulated other comprehensive income	(5,131)
CET1 capital	<u>8,371,192</u>
Preferred stock	1,145,000
Additional Tier 1 capital	<u>1,145,000</u>
Tier 1 capital	<u>9,516,192</u>
Tier 2 capital instruments—subordinated notes	777,885
Qualifying allowance for loan losses	508,132
Tier 2 capital	<u>1,286,017</u>
Total risk-based capital	<u>\$ 10,802,209</u>

### **3. Capital Adequacy**

The Bank is committed to maintaining a robust capital planning process. The objectives of the Bank's capital planning process are to (a) establish and refine capital goals, (b) determine appropriate capital targets and composition of capital, (c) make decisions about capital actions, and (d) maintain contingency capital plans. The Bank begins its capital planning process with its annual business planning process, including a rolling, multi-year projection of its balance sheet, income statement and key operating and capital ratios based on the current and expected state of the economy and the Bank's expected growth and investment plans.

The business plan allows the Bank to project a baseline case and thereby estimate balance sheet growth, expected earnings and capital resources under expected business conditions.

As described in "Item 1. Business—Supervision and Regulation—Stress Testing" in our 2019 Form 10-K, the Bank is not currently subject to the Dodd-Frank Wall Street Reform and Consumer Protection Act's (the "Dodd-Frank Act") company-run stress testing requirements. Nevertheless, in the normal course of operations, the Bank periodically performs internal capital stress tests in order to (a) translate risk measures into estimates of potential losses over one or more stress scenarios, (b) define available capital resources under one or more stress scenarios and (c) bring together estimates of losses and capital resources under one or more stress scenarios to assess the combined impact on capital adequacy in relation to the Bank's business plans and stated goals for the level and composition of capital and proposed capital actions.

The Board of Directors of the Bank (the "Board") and senior management utilize internal stress testing to better understand the loss-absorption capabilities of the Bank's capital base and to better plan the Bank's capital actions, including new capital issuances and the payment of cash dividends on its common stock. In analyzing the Bank's performance and capital adequacy under stress, the Bank analyzes quarterly projected capital ratios under one or more economic scenarios and compares the results to projected capital ratios under its business plan.

In its capital adequacy assessment, the Bank also incorporates current and pending regulatory requirements, factors in material risks, and builds in appropriate capital buffers to manage against the impact of what we believe to be reasonably foreseeable sources of uncertainty and we seek to ensure adequate capital under stressful conditions. All assessments of capital adequacy are informed by current and relevant analysis and are subject to challenge by senior management and the Board and to regulatory oversight.

The Bank maintains internal controls governing its business planning and capital adequacy assessment processes. Such controls include appropriate policies and procedures, change control processes, model validation, comprehensive documentation, and review by internal audit. The primary objective of such controls and governance procedures is to provide a consistent, thoughtful, transparent, and reviewed process for (a) generating a baseline set of business projections, and (b) estimating hypothetical losses and capital levels under one or more stress scenarios.

First Republic is not subject to the Market Risk requirements (the "Market Risk Capital Rule") under subpart F of the rules issued by the federal banking agencies implementing the Basel Committee on Banking Supervision's capital framework (the "Basel III Capital Rules").

For additional information related to capital requirements, see "Item 1. Business—Supervision and Regulation—Capital Requirements" in our 2019 Form 10-K and "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations—Capital Resources" in our 2019 Form 10-K. First Republic Bank is the top tier parent company of our corporate group and has no bank holding company or any depository institution subsidiaries.

The following table presents risk-weighted assets by exposure types:

**Table 3.1: Basel III Standardized Approach Risk-Weighted Assets**

(\$ in thousands)	December 31, 2019
On-balance sheet assets:	
Exposures to sovereign entities <sup>(1)</sup>	\$ 38,511
Exposures to certain supranational entities and multilateral development banks (“MDBs”)	—
Exposures to depository institutions, foreign banks, and credit unions	44,081
Exposures to public sector entities (“PSEs”) <sup>(2)</sup>	6,786,360
Exposures to government-sponsored enterprises (“GSEs”)	629,121
Corporate exposures	26,960,262
Residential mortgage exposures	25,973,691
Statutory multifamily mortgages and pre-sold construction loans	918,915
High volatility commercial real estate (“HVCRE”) loans	443,624
Past due loans	76,366
Other loans	7,613,950
Other assets	3,639,958
Cleared transactions	—
Default fund contributions	—
Unsettled transactions	—
Securitization exposures	4,627
Equity exposures	1,672,220
Off-balance sheet exposures:	
Loan commitments	9,565,703
Letters of credit	468,467
All other off-balance sheet liabilities	30,232
Derivative contracts	19,855
<b>Total Standardized Approach Risk-Weighted Assets</b>	<b>\$ 84,885,943</b>

<sup>(1)</sup> Represents exposures to the U.S. Government and U.S. Government agencies.

<sup>(2)</sup> Represents exposures to U.S. states and political subdivisions.

The following table presents the Bank’s risk-based capital ratios:

**Table 3.2: Capital Ratios**

	December 31, 2019
CET1 capital	9.86 %
Tier 1 capital	11.21 %
Total capital	12.73 %

#### **4. Capital Conservation Buffer**

A “capital conservation buffer” of 2.5% of risk-weighted assets is also required under the Basel III Capital Rules. The capital conservation buffer is designed to absorb losses during periods of economic stress. Banking institutions with a CET1 capital ratio above the minimum requirement but below the capital conservation buffer will face constraints on dividends, equity repurchases and compensation based on the amount of the shortfall and “eligible retained income” (that is, net income for the four calendar quarters preceding the current calendar quarter, net of any distributions and associated tax effects not already reflected in net income).

The capital conservation buffer of a banking organization is the lowest of the following three ratios:

- The CET1 capital ratio minus its minimum CET1 capital ratio;
- The tier 1 capital ratio minus its minimum tier 1 capital ratio; and
- The total capital ratio minus its minimum total capital ratio.

The following table presents the capital conservation buffer calculations for the Bank:

	<b>December 31, 2019</b>		
	<b>Capital Ratios</b>	<b>Minimum Capital Ratios</b>	<b>Capital Conservation Buffer</b>
CET1 capital .....	9.86 %	4.50 %	5.36 %
Tier 1 capital .....	11.21 %	6.00 %	5.21 %
Total capital .....	12.73 %	8.00 %	4.73 %

As of December 31, 2019, the Bank’s capital conservation buffer was 4.73%, which exceeded the minimum requirement of 2.5%.

There were no limitations on the Bank’s distributions or discretionary bonus payments resulting from the capital conservation buffer framework. As of December 31, 2019, the Bank’s eligible retained income was \$753.2 million.

## 5. Credit Risk

### Loans

The following credit risk policies are described in “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations—Asset Quality,” Note 1, “Summary of Significant Accounting Policies” and Note 4, “Loans and Allowance for Loan Losses” in “Item 8. Financial Statements and Supplementary Data” in the 2019 Form 10-K:

- Policy for determining past due or delinquency status
- Policy for placing loans on nonaccrual status
- Policy for returning loans to accrual status
- Definition of and policy for identifying impaired loans
- Methodology for estimating allowance for loan losses
- Policy for charging off uncollectible amounts

The majority of the Bank’s loan portfolio is secured by real estate. A decline in real estate values can negatively impact our ability to recover our investment should the borrower become delinquent. We safeguard against this risk by rarely exceeding a loan-to-value ratio of 80% with respect to real estate lending. Discussion of the Bank’s credit risk management process is presented in “Item 1. Business—Lending Activities—Underwriting” and “Item 1. Business—Lending Activities—Credit Risk Management” in the 2019 Form 10-K.

The following table presents the geographical distribution of total loan commitments. The location is based on the property address for real estate secured loans, and the borrower’s primary address for other loans.

**Table 5.1: Total Loan Commitment by Geographic Location**

(\$ in thousands)	December 31, 2019									
	Unpaid Principal Balance	Unfunded Commitment	Total Commitment	Percent of Total Commitment						
				San Francisco Bay Area	New York Metro Area	Los Angeles Area	Boston Area	San Diego Area	Other

<sup>(1)</sup> Includes loans held for sale.

## **Investment Securities**

The Bank conducts a regular assessment of its investment securities portfolio to determine whether securities are other-than-temporarily impaired considering, among other factors, the nature of the securities, credit ratings or financial condition of the issuer, the extent and duration of the unrealized loss, expected cash flows, market conditions and the Bank's ability to hold the securities through the anticipated recovery period.

For information on credit exposures related to investment securities, refer to Note 3, "Investment Securities" in "Item 8. Financial Statements and Supplementary Data" in the 2019 Form 10-K.

## **6. Counterparty Credit Risk-Related Exposures**

The Bank has exposure to various counterparties and routinely executes transactions with the Bank's clients and counterparties in the financial services industry, including commercial banks, brokers, dealers and investment banks. Such transactions may expose the Bank to credit risk in the event of a default by a counterparty. In addition, the Bank's credit risk may be increased in the event that any collateral that the Bank holds cannot be realized upon or is liquidated at prices not sufficient to recover the full amount of the credit or derivative exposure due to the Bank. The Bank posts collateral to certain counterparties to secure exposures to those counterparties. These collateral agreements do not require that additional collateral be posted in the event that the Bank experiences a deterioration in its creditworthiness. In accordance with internal policy on limitations on counterparty exposures, the Bank evaluates its collateral positions on a regular basis as part of its ongoing monitoring of counterparty exposures.

### *Foreign Exchange Contracts*

The Bank has freestanding derivative assets and liabilities, which consist of foreign exchange contracts executed with clients in which the Bank offsets the client exposure with a financial institution counterparty. The Bank does not retain significant foreign exchange risk. The Bank does retain credit risk, both to the client and the financial institution counterparty, which is evaluated and managed by the Bank in the normal course of its operations. In addition, the Bank has foreign exchange contracts associated with client deposits denominated in various foreign currencies. Management does not currently anticipate non-performance by any of the counterparties.

Counterparties in foreign exchange derivative contracts are either First Republic clients or financial institution counterparties. The Bank is exposed to the risk that the client or financial institution counterparty will not fulfill its transaction obligations. Such credit risk is not significant and is typically addressed by establishing a credit limit for the client or financial institution.

Client credit limits are based primarily on credit guidelines established and monitored by the Bank and take into account the client's outstanding debt and general creditworthiness, and collateral held by the Bank. Financial institution counterparty credit risk is managed through credit, contract and settlement limits established and monitored by the Bank. To mitigate this risk, the Bank enters into master netting and bilateral collateral agreements with certain counterparties. These agreements allow the Bank to settle its derivative contracts with such counterparties on a net basis and to offset the net derivative exposure against the related collateral in the event of default. Daily collateral management activities are performed by the Bank in accordance with bilateral netting agreements. Currently, the primary form of collateral related to foreign exchange contracts with clients and financial institution counterparties is cash.

### *Interest Rate Contracts*

The Bank originates certain mortgage loans with the intention of selling these loans to investors. The Bank enters into commitments to originate the loans whereby the interest rate on the loan paid by the borrower is set prior to funding ("interest rate lock commitments"). Such interest rate lock commitments are accounted for as freestanding derivative instruments that do not qualify as hedges. However, the interest rate exposure is economically hedged by the forward loan sale commitment to the investor. Credit risk associated with these interest rate contracts is nominal.

The following table presents the Bank's over-the-counter derivatives:

**Table 6.1: Over-the-Counter Derivatives**

(\$ in thousands)	December 31, 2019		
	Notional or Contractual Amount <sup>(1)</sup>	Fair Value <sup>(1)</sup>	Net Unsecured Credit Exposure <sup>(2)</sup>
Foreign exchange contracts	\$ 4,052,674	\$ 39,235	\$ 3,299
Interest rate contracts	33,414	5	5
Total over-the-counter derivatives	<u>\$ 4,086,088</u>	<u>\$ 39,240</u>	<u>\$ 3,304</u>

<sup>(1)</sup> Excludes written options and spot contracts for regulatory capital purposes.

<sup>(2)</sup> Represents the amount of credit exposure that is reduced due to the netting of offsetting positive and negative exposures where a valid master netting agreement exists, and collateral is held.

#### Collateral Held

With respect to the Bank's counterparty credit risk, the primary form of collateral is cash. At December 31, 2019, the fair value of cash collateral accepted by the Bank as part of foreign exchange derivative activities was \$33.5 million.

## 7. Credit Risk Mitigation

The Bank uses various strategies to mitigate counterparty credit risk, including establishing credit risk appetite measures and setting internal policy limits on acceptable levels of exposure to each counterparty, although there can be no assurance that these strategies will be successful under all circumstances. The Bank also obtains collateral from derivatives counterparties to manage overall credit risk. Refer to Section 6, "Counterparty Credit Risk-Related Exposures—Collateral Held" within this document for discussion of collateral related to derivative counterparties.

Certain exposures within the Bank's investment securities portfolio are issued or guaranteed by the U.S. Government, U.S. Government agencies or U.S. Government-sponsored agencies. The following table presents the investment securities exposures that are covered by guarantees and the risk-weighted asset amount associated with such exposures:

**Table 7.1: Exposures Covered by Guarantees**

(\$ in thousands)	December 31, 2019	
	Exposure Amount <sup>(1)</sup>	Risk-Weighted Asset Amount
<b>Debt securities available-for-sale:</b>		
Agency residential mortgage-backed securities ("MBS") <sup>(2)</sup>	\$ 367,671	\$ 72,453
Agency commercial MBS <sup>(2)</sup>	857,754	38,205
<b>Debt securities held-to-maturity:</b>		
U.S. Government-sponsored agency securities	368,065	73,613
Agency residential MBS <sup>(2)</sup>	2,224,252	444,850
Agency commercial MBS <sup>(2)</sup>	3,295,317	—
Total	<u>\$ 7,113,059</u>	<u>\$ 629,121</u>

<sup>(1)</sup> Since the Bank has made the accumulated other comprehensive income ("AOCI") opt-out election, the available-for-sale exposure amounts for purposes of risk weighting is the carrying value of the security less any unrealized gain on the exposure plus any unrealized loss on the exposure included in AOCI.

<sup>(2)</sup> Issued or guaranteed by U.S. Government agencies or U.S. Government-sponsored agencies.

## 8. Securitization

As of December 31, 2019, the Bank has securitization exposures related to its investments in non-agency residential mortgage backed securities created by third parties, which totaled \$4.2 million. For these securitization exposures, the Bank calculates the regulatory capital requirements in accordance with the Simplified Supervisory Formula Approach (“SSFA”) to determine the risk-weighting for these assets, which considers the Bank’s seniority in the securitization structure and risk factors inherent in the underlying assets.

The following table presents the Bank’s securitization exposures by risk weight range for the non-agency residential mortgage-backed securities created by third parties:

**Table 8.1: Securitization Exposures by Risk Weight Range**

(\$ in thousands)	December 31, 2019		
	On-Balance Sheet Exposure <sup>(1)</sup>	Risk-Weighted Asset Amount (SSFA)	Capital Requirement <sup>(2)</sup>
0% through 100% .....	\$ 473	\$ 449	\$ 36
Greater than 100% through 1,250% .....	3,691	4,178	334
Total .....	<u>\$ 4,164</u>	<u>\$ 4,627</u>	<u>\$ 370</u>

<sup>(1)</sup> Since the Bank has made the AOCI opt-out election, the available-for-sale exposure amounts for purposes of risk weighting is the carrying value of the security less any unrealized gain on the exposure plus any unrealized loss on the exposure included in AOCI.

<sup>(2)</sup> Calculated by multiplying the risk-weighted asset by the total risk-based capital ratio of 8%, which represents the minimum to be adequately capitalized.

## 9. Equity Exposures not Subject to Market Risk Capital Rule

The Bank’s equity exposures, which are not subject to the Market Risk Capital Rule, include the following investments:

*Federal Home Loan Bank (“FHLB”) stock:* FHLB stock is redeemable at par and recorded at cost, which approximates fair value. FHLB stock is a statutory investment required by regulation as part of FHLB membership.

*Low income housing tax credit investments:* Low income housing tax credit investments are accounted for using a proportional amortization method, whereby the initial cost of the Bank’s low income housing tax credit investments is amortized over the life of the investment. Under the proportional amortization method, amortization expense recognized in each period is based on the amount of tax credits and other tax benefits for the period as a percentage of expected total tax credits and other tax benefits of the investment. Amortization expense is presented as a component of provision for income taxes on the statement of income. Such investments are designed to generate a return primarily through the realization of federal tax credits.

*Investments in mutual funds and marketable equity securities:* Mutual funds and marketable equity securities have readily determinable fair values and are recorded at fair value, with changes in fair value recognized in earnings.

*Other investments:* Other investments consist of equity investments without readily determinable fair values. These investments are accounted for under the equity method or at cost less impairment, adjusted for observable price changes of the same or similar investment. Equity method investments are recorded at cost and subsequently adjusted for allocated earnings or losses, as well as for cash distributions. Such investments are periodically evaluated for impairment.

Latent revaluation gains and losses are unrealized gains and losses, which are not recognized in the Bank’s balance sheets or statements of income and comprehensive income. Since the carrying value of the Bank’s equity method investments and non-marketable equity securities approximates their fair value, management believes that any unrealized latent revaluation gains or losses that may exist are immaterial.

*Investments in separate account life insurance:* Investments in separate account life insurance are initially recorded at cost and the carrying value of the investment is subsequently adjusted quarterly to its cash surrender value. The Bank recognizes the resulting income or loss in noninterest income. The carrying amount of investments in separate account life insurance reflects the total cash surrender value of each policy, which approximates fair value.

The following table presents capital requirements for equity exposures:

**Table 9.1: Equity Exposures by Type and Risk Weight**

(\$ in thousands)	December 31, 2019			
	Non-Publicly Traded Exposures <sup>(1)</sup>	Publicly Traded Exposures <sup>(1)</sup>	Risk-Weighted Asset Amount	Capital Requirements <sup>(2)</sup>
<b>Simple Risk Weight Approach: <sup>(3)</sup></b>				
20% risk weight:				
FHLB stock .....	\$ 367,943	\$ —	\$ 73,589	\$ 5,887
100% risk weight:				
Low income housing tax credit investments .....	1,100,509	—	1,100,509	88,041
Marketable equity securities .....	—	1,725	1,725	138
Other investments .....	72,921	—	72,921	5,834
<b>Other Risk-Weighting Approaches: <sup>(4)</sup></b>				
Investments in separate account life insurance .....	61,291	—	419,904	33,592
Mutual funds .....	—	17,861	3,572	286
<b>Total .....</b>	<b>\$ 1,602,664</b>	<b>\$ 19,586</b>	<b>\$ 1,672,220</b>	<b>\$ 133,778</b>

<sup>(1)</sup> For non-publicly traded exposures, the amount represents cost. For publicly traded exposures, the amount represents fair value.

<sup>(2)</sup> Calculated by multiplying the risk-weighted asset by the total risk-based capital ratio of 8%, which represents the minimum to be adequately capitalized.

<sup>(3)</sup> The Bank applies the simple risk-weight approach to equity exposures that are not mutual funds or other investment funds.

<sup>(4)</sup> The Bank applies the full look-through, simple modified look-through or alternative modified look-through approach to equity exposures that are mutual funds and other investment funds.

There were no net realized gains or losses arising from sales and liquidations of any equity exposures for the quarter ended December 31, 2019.

## 10. Interest Rate Risk for Non-Trading Activities

See “Interest Rate Risk Management” in “Item 7A. Quantitative and Qualitative Disclosures About Market Risk” in the 2019 Form 10-K for information on interest rate risk for non-trading activities.

## **Information Regarding Forward-Looking Statements**

This document and our 2019 Form 10-K contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Statements in this document and our 2019 Form 10-K that are not historical facts are hereby identified as “forward-looking statements” for the purpose of the safe harbor provided by Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). Any statements about our expectations, beliefs, plans, predictions, forecasts, objectives, assumptions or future events or performance are not historical facts and may be forward-looking. These statements are often, but not always, made through the use of words or phrases such as “anticipates,” “believes,” “can,” “could,” “may,” “predicts,” “potential,” “should,” “will,” “estimates,” “plans,” “projects,” “continuing,” “ongoing,” “expects,” “intends” and similar words or phrases. Accordingly, these statements are only predictions and involve estimates, known and unknown risks, assumptions and uncertainties. Our actual results could differ materially from those expressed or anticipated in such forward-looking statements as a result of risks and uncertainties more fully described under “Item 1A. Risk Factors” in our 2019 Form 10-K.

Forward-looking statements involving such risks and uncertainties include, but are not limited to, statements regarding: projections of loans, assets, deposits, liabilities, revenues, expenses, tax liabilities, net income, capital expenditures, liquidity, dividends, capital structure, investments or other financial items; expectations regarding the banking and wealth management industries; descriptions of plans or objectives of management for future operations, products or services; forecasts of future economic conditions generally and in our market areas in particular, which may affect the ability of borrowers to repay their loans and the value of real property or other property held as collateral for such loans; our opportunities for growth and our plans for expansion (including opening new offices); expectations about the performance of any new offices; projections about the amount and the value of intangible assets, as well as amortization of recorded amounts; future provisions for credit losses on loans and debt securities; changes in nonperforming assets; projections about future levels of loan originations or loan repayments; projections regarding costs, including the impact on our efficiency ratio; and descriptions of assumptions underlying or relating to any of the foregoing. Factors that could cause actual results to differ from those discussed in the forward-looking statements include, but are not limited to: significant competition to attract and retain banking and wealth management customers, from both traditional and non-traditional financial services and technology companies; our ability to recruit and retain key managers, employees and board members; the possibility of earthquakes, fires and other natural disasters affecting the markets in which we operate; interest rate risk and credit risk; our ability to maintain and follow high underwriting standards; economic and market conditions, including those affecting the valuation of our investment securities portfolio and credit losses on our loans and debt securities; real estate prices generally and in our markets; our geographic and product concentrations; demand for our products and services; developments and uncertainty related to the future use and availability of reference rates, such as the London Interbank Offered Rate and the 11th District Monthly Weighted Average Cost of Funds Index, as well as other alternative reference rates; the regulatory environment in which we operate, our regulatory compliance and future regulatory requirements; any future changes to regulatory capital requirements; legislative and regulatory actions affecting us and the financial services industry, such as the Dodd-Frank Act, including increased compliance costs, limitations on activities and requirements to hold additional capital, as well as changes to the Dodd-Frank Act pursuant to the Economic Growth, Regulatory Relief, and Consumer Protection Act; our ability to avoid litigation and its associated costs and liabilities; future FDIC special assessments or changes to regular assessments; fraud, cybersecurity and privacy risks; and custom technology preferences of our customers and our ability to successfully execute on initiatives relating to enhancements of our technology infrastructure, including client-facing systems and applications.

For a discussion of these and other risks and uncertainties, see “Item 1A. Risk Factors” in our 2019 Form 10-K and any subsequent reports filed by First Republic under the Exchange Act. These filings are available in the Investor Relations section of our website. All forward-looking statements are necessarily only estimates of future results, and there can be no assurance that actual results will not differ materially from expectations, and, therefore, you are cautioned not to place undue reliance on such statements. Any forward-looking statements are qualified in their entirety by reference to the factors discussed in our 2019 Form 10-K and our other public filings under the Exchange Act. Further, any forward-looking statement speaks only as of the date on which it is made, and we undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which the statement is made or to reflect the occurrence of unanticipated events.

(4) Information about (market or credit) risk concentrations with respect to credit risk mitigation.				
<b>Quantitative Disclosures</b>				
(b)	For each separately disclosed credit risk portfolio, the total exposure that is covered by eligible financial collateral, and after the application of haircuts.	<b>Basel III Regulatory Capital Disclosures:</b> 6. Counterparty Credit Risk-Related Exposures	12	
(c)	For each separately disclosed portfolio, the total exposure that is covered by guarantees/credit derivatives and the risk-weighted asset amount associated with that exposure.	<b>Basel III Regulatory Capital Disclosures:</b> Table 7.1: Exposures Covered by Guarantees	12	

Disclosure Requirement		Disclosure Location	Basel III Regulatory Capital Disclosures Page	Form 10-K Page
<b>Table 8 - Securitization</b>				
<b>Qualitative Disclosures</b>				
(a)	<p>The general qualitative disclosure requirement with respect to a securitization (including synthetic securitizations), including a discussion of:</p> <p>(1) The FDIC-supervised institution's objectives for securitizing assets, including the extent to which these activities transfer credit risk of the underlying exposures away from the FDIC-supervised institution to other entities and including the type of risks assumed and retained with resecuritization activity;</p> <p>(2) The nature of the risks (e.g. liquidity risk) inherent in the securitized assets;</p> <p>(3) The roles played by the FDIC-supervised institution in the securitization process and an indication of the extent of the FDIC-supervised institution's involvement in each of them;</p> <p>(4) The processes in place to monitor changes in the credit and market risk of securitization exposures including how those processes differ for resecuritization exposures;</p> <p>(5) The FDIC-supervised institution's policy for mitigating the credit risk retained through securitization and resecuritization exposures; and</p> <p>(6) The risk-based capital approaches that the FDIC-supervised institution follows for its securitization exposures including the type of securitization exposure to which each approach applies.</p>	Not applicable. In 2019, the Bank did not have any securitization activities.		
(b)	<p>A list of:</p> <p>(1) The type of securitization SPEs that the FDIC-supervised institution, as sponsor, uses to securitize third-party exposures. The FDIC-supervised institution must indicate whether it has exposure to these SPEs, either on- or off- balance sheet; and</p> <p>(2) Affiliated entities:</p> <p>(i) That the FDIC-supervised institution manages or advises; and</p> <p>(ii) That invest either in the securitization exposures that the FDIC-supervised institution has securitized or in securitization SPEs that the FDIC-supervised institution sponsors.</p>	Not applicable. In 2019, the Bank did not have any securitization activities.		
(c)	<p>Summary of the FDIC-supervised institution's accounting policies for securitization activities, including:</p> <p>(1) Whether the transactions are treated as sales or financings;</p> <p>(2) Recognition of gain-on-sale;</p> <p>(3) Methods and key assumptions applied in valuing retained or purchased interests;</p> <p>(4) Changes in methods and key assumptions from the previous period for valuing retained interests and impact of the changes;</p> <p>(5) Treatment of synthetic securitizations;</p> <p>(6) How exposures intended to be securitized are valued and whether they are recorded under subpart D of this part; and</p> <p>(7) Policies for recognizing liabilities on the balance sheet for arrangements that could require the FDIC-supervised institution to provide financial support for securitized assets.</p>	Not applicable. In 2019, the Bank did not have any securitization activities.		
(d)	An explanation of significant changes to any quantitative information since the last reporting period.	Not applicable. In 2019, the Bank did not have any securitization activities.

<b>Table 8 - Securitization (continued)</b>				
<b>Quantitative Disclosures</b>				
(e)	The total outstanding exposures securitized by the FDIC-supervised institution in securitizations that meet the operational criteria provided in § 324.41 (categorized into traditional and synthetic securitizations), by exposure type, separately for securitizations of third-party exposures for which the bank acts only as sponsor.	Not applicable. In 2019, the Bank did not have any securitization activities.		
(f)	For exposures securitized by the FDIC-supervised institution in securitizations that meet the operational criteria in § 324.41:	Not applicable. In 2019, the Bank did not have any securitization activities.		
	(1) Amount of securitized assets that are impaired/past due categorized by exposure type; and			
	(2) Losses recognized by the FDIC-supervised institution during the current period categorized by exposure type.			
(g)	The total amount of outstanding exposures intended to be securitized categorized by exposure type.	Not applicable. The Bank has no outstanding exposures intended to be securitized.		
(h)	Aggregate amount of:	<b>Basel III Regulatory Capital Disclosures:</b> Table 8.1: Securitization Exposures by Risk Weight Range	13	
	(1) On-balance sheet securitization exposures retained or purchased categorized by exposure type; and			
	(2) Off-balance sheet securitization exposures categorized by exposure type.	Not applicable. The Bank does not have any off-balance sheet securitization exposures.		
(i)	(1) Aggregate amount of securitization exposures retained or purchased and the associated capital requirements for these exposures, categorized between securitization and resecuritization exposures, further categorized into a meaningful number of risk weight bands and by risk-based capital approach (e.g., SSFA); and	<b>Basel III Regulatory Capital Disclosures:</b> Table 8.1: Securitization Exposures by Risk Weight Range	13	
	(2) Aggregate amount disclosed separately by type of underlying exposure in the pool of any: (i) After-tax gain-on-sale on a securitization that has been deducted from common equity tier 1 capital; and (ii) Credit-enhancing interest-only strip that is assigned a 1,250 percent risk weight.	Not applicable. The Bank does not have any such securitization exposures.		
(j)	Summary of current year's securitization activity, including the amount of exposures securitized (by exposure type), and recognized gain or loss on sale by exposure type.	Not applicable. In 2019, the Bank did not have any securitization activities.		
(k)	Aggregate amount of resecuritization exposures retained or purchased categorized according to: (1) Exposures to which credit risk mitigation is applied and those not applied; and (2) Exposures to guarantors categorized according to guarantor creditworthiness categories or guarantor name.	Not applicable. The Bank does not have any resecuritization exposures.

<b>Table 9 - Equity Exposures not Subject to Market Risk Capital Rules</b>				
<b>Qualitative Disclosures</b>				
(a)	The general qualitative disclosure requirement with respect to equity risk for equities not subject to subpart F of this part, including: (1) Differentiation between holdings on which capital gains are expected and those taken under other objectives including for relationship and strategic reasons; and (2) Discussion of important policies covering the valuation of and accounting for equity holdings not subject to subpart F of this part. This includes the accounting techniques and valuation methodologies used, including key assumptions and practices affecting valuation as well as significant changes in these practices.	<b>Basel III Regulatory Capital Disclosures:</b> 9. Equity Exposures not Subject to Market Risk Capital Rule	13-14	
<b>Quantitative Disclosures</b>				
(b)	Value disclosed on the balance sheet of investments, as well as the fair value of those investments; for securities that are publicly traded, a comparison to publicly-quoted share values where the share price is materially different from fair value.	<b>Basel III Regulatory Capital Disclosures:</b> Table 9.1: Equity Exposures by Type and Risk Weight  <b>12/31/2019 Call Report:</b> - Schedule RC-F - Schedule RC-R	14	
(c)	The types and nature of investments, including the amount that is: (1) Publicly traded; and (2) Non-publicly traded.			
(d)	The cumulative realized gains (losses) arising from sales and liquidations in the reporting period.	<b>Basel III Regulatory Capital Disclosures:</b> 9. Equity Exposures not Subject to Market Risk Capital Rule	14	
(e)	(1) Total unrealized gains (losses). (2) Total latent revaluation gains (losses). (3) Any amounts of the above included in tier 1 or tier 2 capital.	Not applicable. There are no unrealized gains (losses) included in tier 1 or tier 2 capital related to publicly traded equity exposures.  Not applicable. Any latent revaluation gains or losses that may exist are immaterial.  <b>Basel III Regulatory Capital Disclosures:</b> 9. Equity Exposures not Subject to Market Risk Capital Rule	13	
(f)	Capital requirements categorized by appropriate equity groupings, consistent with the FDIC-supervised institution's methodology, as well as the aggregate amounts and the type of equity investments subject to any supervisory transition regarding regulatory capital requirements.	<b>Basel III Regulatory Capital Disclosures:</b> Table 9.1: Equity Exposures by Type and Risk Weight	14	
<b>Table 10 - Interest Rate Risk for Non-Trading Activities</b>				
<b>Qualitative Disclosures</b>				
(a)	The general qualitative disclosure requirement, including the nature of interest rate risk for non-trading activities and key assumptions, including assumptions regarding loan prepayments and behavior of non-maturity deposits, and frequency of measurement of interest rate risk for non-trading activities.	<b>2019 Form 10-K:</b> - Item 7A. Quantitative and Qualitative Disclosures About Market Risk		101-103
<b>Quantitative Disclosures</b>				
(b)	The increase (decline) in earnings or economic value (or relevant measure used by management) for upward and downward rate shocks according to management's method for measuring interest rate risk for non-trading activities, categorized by currency (as appropriate).	<b>2019 Form 10-K:</b> - Item 7A. Quantitative and Qualitative Disclosures About Market Risk		103
